

## StuInfo Guest Access

Students are cautioned never to share their MSU NetID and password with anyone. Instead, they may give parents, spouses, and others access to [StuInfo](#) by creating guest accounts for them. Guests may be granted access to view and pay the student's bill, view financial aid information, view IRS 1098-T data, view MSU charges and credits, and confirm the student's attendance.

### Student Instructions

To add or remove guests, simply login to [StuInfo](#) and choose Manage Guests from the Other menu in the top-right corner of the page. You may also change which parts of StuInfo your existing guests have access to by using the Manage Guests page.

### Guest Instructions

First, make sure that your student created a guest account for you and that you followed the instructions in the activation email, then login to StuInfo by following these instructions:

1. Go to [StuInfo](#).
2. Enter your Community ID (i.e. your email address) into the MSU ID field.
3. Enter your password.
4. Click the Login button.

You may use the [Community ID Self Service](#) page to unlock your account, reset your password, or change your email address.

### Security Questions

You or anyone calling on your behalf will need to be able to answer your [security questions](#) in order to discuss account information. If you would like to authorize guests to be able to discuss confidential information related to your financial aid, you will need to add them to the list of **Individuals Authorized to Receive My Financial Aid Information** on the Manage Guests page, and you will need to share your [security questions](#) with them.
